

ARCADENEXUS ASSET DOCUMENT

This document details the visual identity, brand guidelines, audio assets, and data schemas required to implement the ArcadeNexus web gaming platform.

1. Brand Guidelines & Look

ArcadeNexus uses a retro-inspired, dark cybernetic aesthetic. Developers must adhere strictly to the color palette below for all CSS borders, shadows, navigation elements, text, and game menus.

			
Deep Void #0B0C10	Cyber Gray #1F2833	Neon Teal #66FCF1	Laser Cyan #45A29E

Typography

- Headings & Logos:** Orbitron (sans-serif, weights: 700, 900) for clean futuristic gaming titles.
- Body Copy & Dashboard Stats:** Inter (sans-serif, weights: 300, 400, 600) for highly readable numbers and tables.

2. Game Graphics & Icons

Asset ID	File Path / Source	Type	Description & Usage
logo_full	assets/images/logo.svg	Vector Image	Main branding logo, placed in top navigation bar and footer.
icon_tictactoe	assets/images/ttt_card.png	PNG (200x200)	Display thumbnail for the Tic-Tac-Toe game selection card.
icon_snake	assets/images/snake_card.png	PNG (200x200)	Display thumbnail for the Snake game selection card.

Asset ID	File Path / Source	Type	Description & Usage
icon_memory	assets/images/memory_card.png	PNG (200x200)	Display thumbnail for the Memory Match game selection card.

3. Audio Assets

Asset ID	File Path	Format	Loudness / Specs
sound_click	assets/audio/click.mp3	MP3, Mono, 44kHz	-14 LUFS, played on UI button hover or game tile click.
sound_score	assets/audio/score.mp3	MP3, Mono, 44kHz	-14 LUFS, played when a point is scored in Snake or a pair is matched in Memory.
sound_gameover	assets/audio/gameover.mp3	MP3, Stereo, 44kHz	-12 LUFS, played when a game finishes (win/loss/draw).
bgm_loop	assets/audio/cyber_beats.mp3	MP3, Stereo, 44kHz	-20 LUFS, looped background track (must support mute toggle).

4. Data Schema (localStorage)

To persist statistics across browser reloads, developers must store all user metrics in a single localStorage object key named `arcadenexus_stats` as a JSON string matching this structure:

```
{
  "total_games_played": 15,
  "games": {
    "tictactoe": { "played": 5, "wins": 3, "losses": 1, "ties": 1, "high_score": 3 },
    "snake": { "played": 6, "wins": 0, "losses": 6, "ties": 0, "high_score": 142 },
    "memory": { "played": 4, "wins": 2, "losses": 2, "ties": 0, "high_score": 12 }
  }
}
```
